

2XSL(ST)CYK-J

Motor control and power supply cable, 0,6/1 kV
 +90 °C service temperature, optimised screen, oil, UV and ozone resistant
 adapted to VDE 250 and IEC 60092-353

Application

Flexible motor power supply cable for frequency converter controlled AC drives in industries or wind turbines. This cable type, that incorporate a special screen and have a symmetrical distribution of the protective conductor (3x... + 3G...), are adequate for facilities where it is necessary to avoid the interferences of electromagnetic waves of high frequency of nearby circuits, as variation engines of speed. For fixed installation and occasional free flexing indoors in dry, damp and wet conditions, as well as outdoors for low mechanical stress. Underground installation is allowed provided that the cable is installed in a sufficiently drained tube (no water accumulation).

Construction

1. Conductor: Copper conductor, bare, flexible (class 5)
2. Insulation: XLPE
3. Core identification: according to HD 308 S2
3. Separator: Plastic tape
4. Multilayer screen, EMC optimised regarding to radio frequency interference field
4. Screen 1st layer: Laminated Alu/PETP tape
5. Screen 2nd layer: Copper wire braid, tinned
6. Outer sheath: PVC, black

Technical information

Rated voltage	U_0/U	0,6/1 kV
Test voltage		4 kV
Max. permissible temperature at conductor		90 °C
Max. short circuit temperature of the conductor		250 °C (max, 5 sec)
Min. operating temperature	fixed installation occasional flexing	-40 °C -15 °C
Min. bending radius mm	fixed installation occasional flexing	10 x outer diameter in mm 20 x outer diameter in mm
Flame spread	single cable	IEC 60332-1-2

Additional parameters
 Largely oil resistant
 UV resistant
 Ozone resistant
